###Test plan###

Overview:

Test functionality of duo bots

Test Criteria:
        Ensure that the player can view all the bots.
        Display the amount of times the player and computer have won

Entry Criteria:
        Has a connection to a server

Exit Criteria:
        All tests have passed

###Test Case###

Description:
        All bots should be displayed for the player to see

Step:
        The "See All Bots" button should function when clicked

Post condition:
        All bots should be shown to view

###Bug report###

Description:
        When player wins duel, the winning point is given to the computer instead

Step to reproduce:
        Select two bots and click duel until player has won duel

Expected result:
        The number of wins the player has would should increase each time they win

Actual result:
        When the player wins the number of how many times they lost increases

Environment:
        Chrome Version 111.0.5563.65
        Windows 10
